

Quality Policy

Plasel-Metalicone aims to be the leader in the quality of its products and manufacturing technology for the benefit of its customers. The company regards high quality products as a key factor in attaining its customers' trust and satisfaction.

High quality products will enhance the company's competitiveness and enable its survival, development and establishment in the global and local target markets.

The company regards the attainment of an efficient quality assurance system as a key factor in enhancing its profitability by reducing the costs which are associated with the lack of quality (fixings, re-work, sorting, etc.). An efficient quality assurance system will also enhance the attractiveness of the company's prices and will enable it to manufacture better products.

Plasel-Metalicone regards the application, implementation and compliance with the AS 9100 International as a key factor in enhancing the quality of its processes and products.

Plasel-Metalicone has set itself the goal of constant improvement in all areas of its activities. To achieve the above goals, the company management will enhance all the processes, which are associated with product quality, in order to reduce the number of rejections, recalls and customers' complaints through a systematic process pre-defined objective.

These goals will be attained through the efforts and dedication of each and every one of the company's managers and employees and through a continuous process that enhances improvement of work procedures, efficiency and quality.

Plasel-Metalicone will guide each one of its managers and employees to be loyal to this policy.

Plasel-Metalicone will conduct activities that will ensure the employees' awareness and commitment in regard to their responsibility for the quality of the products and their compliance to the procedures and safety regulations.

The following principles will guide the company:

- All of the company’s activities will be conducted according to a formal procedure system, in compliance with the requirements of the International standard AS 9100. This type of regulated activity ensures complete control over work procedures throughout all the phases and will prevent irregularities and defects.
- The company’s management is committed to the application of the Quality Assurance system and to support the quality assurance staff, in order to achieve the required goals.
The management will operate an orderly training system aimed at updating the plant’s employees and managers in current local and global developments pertaining to the enhancement of quality and work methods in the company’s areas of activity.
- The plant’s management will set general objectives and quality objectives, with associated measurable criteria and examination sets, in order to evaluate the level of success. The plant’s management will perform periodical monitoring on the implementation of these objectives.
- The company’s key success factors are the individual employee and the work teams. The management emphasizes the nurturing of individuals and teams and will therefore lead:
 - An appropriate training and courses system
 - An approach which supports the development of the team spirit
- A special responsibility on the implementation of the procedures lies on the shoulders of the company’s managers, each according to his / her organizational scope of responsibility. Each manager should cooperate with other managers and company departments. The managers should set a personal example and train their workers in every aspect that pertains to the procedures and regulations of the company.
- Each one of the employees must know, understand and accept the company’s quality policy and the procedures which guide his / her work and are related to it. To achieve this goal, the company will manage an appropriate training system.
- The company’s management is committed to provide its employees with all the necessary means for performing the examination and control processes and for the implementation of the pre-defined quality objectives, while taking safety considerations into account.
- The company’s management will distribute and publish the quality policy to all the plant’s employees.
